

## Numbers in digits and words

It is important to practise writing numbers as words. 427 written in words is **four hundred** and *twenty-seven*.

Write your answers below in numerals and then in words. Use these words to help you: *ten, twenty, thirty, forty, fifty, sixty, seventy, eighty, ninety, hundred*.

### 1. Akram has three cards.

- a. Using all three cards, what is the largest number Akram can make?

- b. What is the smallest 3-digit number he can make?

### 2. Akram swaps his cards for three different ones:

- a. Using all three cards, what is the largest number he can make now?

- b. What is the smallest 3-digit number he can make?

### 3. Akram now takes both sets of cards.

- a. Using three different cards, what is the largest 3-digit number he can make?

- b. What is the smallest 3-digit number he can make?
