

Homework due Friday 2nd February 2018

In Class 2 we have started to learn about different materials such as metal, plastic and glass. We are now moving on to what properties different materials have such as rough, smooth, shiny and soft.

Can you find any objects that have these properties in and around your house?

Draw and label pictures of your objects and we will talk about what you have found next Friday.

Texture Hunt

Can you find objects that have these textures?

Use the empty boxes to add your own.

rough	smooth
hard	soft
fuzzy	bumpy
