

CLASS 5/6 SCIENCE HOMEWORK

To be brought into School for Tuesday 11th September 2018

Following on from our discussions this week about different materials, your homework task for this week is to research plastic e.g. what it is produced from, what it can be used for, any interesting facts about this material, etc.

You can present your homework in any format of your choice e.g. written, a poster, using ICT, etc - one side of A4 paper is enough if you decide to do a written piece of work. You will be sharing your research with your group in Science on Tuesday afternoon.
